

**BHORUKA
FABCONS**
PROFILING THE FUTURE IN ALUMINIUM

Finished Aluminum Extrusion products..... Just the way you want them!

Hello!

Bhoruka Aluminium has been among the world's most trusted supplier of Aluminium products globally. With facilities for Extrusions, Anodizing (with technology from *Italtechno, Italy*) and Powder Coating (with technology from *ITW Gema, Switzerland*), Bhoruka Aluminium products has been serving the needs of diverse industry segments from construction and automotive to consumer durables, textiles, irrigation and electrification.

Now comes a brand new initiative from the Group **Bhoruka Fabcons**.

Through this new venture, we intend to add more value to our offerings, delivering you products that are finished to the next level. Our one-stop-solution approach offers you significant cost savings and a number of conveniences.

You can avoid the rejections due to defects in manufacturing, packing or transportation that are common when you use multiple suppliers for getting the finished product. Your inventory is reduced, as you do not have to buy mill finish in bulk for finishing elsewhere. Volume of procurement can be adjusted to match exact needs.

If you are planning to set up your own finishing facilities but find the costs prohibitive because of the small numbers involved, Bhoruka Fabcons is the perfect answer to your problem again.

In essence, using Bhoruka Fabcons as your one-stop source, will mean reduced manpower deployment, less hassles, better quality, shorter time-to-market, and in the end, lower costs. The conveniences that Bhoruka Fabcons offer will allow you to concentrate on your core competencies.

Of course, there are bound to be concerns about quality, delivery time and how far we can go in meeting your specific needs.

The Bhoruka Fabcons facility at Mysore (130kms from Bangalore, in the state of Karnataka, India) is geared to address these very concerns. With an array of top-of-the-line machinery from **Emmegi Group, Italy**, the overall capability's of Bhoruka Fabcons includes CNC machining/programming, Cut to length sawing, Mitre cutting/ compound mitre, Drilling/Chamfering, Counter sinking, Tapping, Milling, Assembling, Vibratory deburring and Packing. The diversity and flexibility of our infrastructure enables us to deliver practically all Aluminum extruded products in finished forms that different industries need. For more information on our facilities and our offerings you can visit <http://www.bhorukaaluminium.com/group.htm>.

For years now customers worldwide across industry segments have relied on the Bhoruka seal of quality in the variety of Aluminium extruded products they have sourced from us. You can expect the same commitment to quality and hunger for customer acceptance in every product that comes out of Bhoruka Fabcons. You can address your queries pertaining to your requirements to Fabcons@bhorukaaluminium.com.

We will be glad to hear from you and fulfill your need for finished Aluminium extruded products of the highest quality from a single-point source.

Yours Sincerely

RK Jain

Director

Bhoruka Fabcons Private Limited
